

Wolfram|One Access For Thirty Days

Wolfram Research is pleased to sponsor the Terris Challenge event by providing access to their latest technology, Wolfram|One! For complimentary access to their development platform and the Wolfram API, just click here:

<https://account.wolfram.com/redeem/zTerrisChallenge821>

This URL will take you to a sign-in page and prompt you to log in using your Wolfram ID. If you don't already have a Wolfram ID, you'll be prompted to create one using an active email address. Once logged in, you will see in the Downloads section which platforms of the software you have access to, with their accompanying activation keys. Please download the desktop version to your machine, boot up the application and use the associated activation key when prompted. This will grant you full access for 30 days from your activation date.

When you access Wolfram|One in the cloud for the first time, you can create a new notebook or load a premade Things to Try live notebook, which is designed to guide you through neat things you can immediately compute in the Wolfram Language.

You can use Wolfram|One to create instant web apps and APIs, or to deploy to mobile. The Wolfram Language is also bundled on the Raspberry Pi, where you can connect directly to hardware, including Arduino etc.

The fastest way to get an API up and running is detailed in the extensive Documentation Center available to you alongside your notebook: simply click the section in the documentation labeled Cloud and Deployment and select Instant APIs to access a handy how-to guide to help get you started.

To view your account details-- including your available Cloud Credits and Cloud storage-- or re-download Wolfram|One, visit the following page:

<https://account.wolfram.com/products>

Wolfram|One is the world's first fully-integrated cloud-desktop hybrid, integrated computation platform. The core of our technology stack is the Wolfram Language, which builds on three decades of development, and represents a new direction in programming-- that happens to be absolutely ideal for hackathons.

Wolfram offers research-based educational programs for science, technology, and innovation. Students of all ages from middle school to post-doc are invited to apply, including gap-year students and professionals interested in our Physics Project. Students should be interested in scientific research, computational thinking, programming with Wolfram Language, machine learning, and project publication. For more information visit:

<https://education.wolfram.com/programs/>

Interested in Wolfram mentorships or internships? Check out our opportunities here:

Qoom 3-month Starter Plan

Qoom is a web development platform for coding creators

The 3-month starter plan includes....

- Unlimited projects
- 500 MB of storage
- Personalized qoom.space URL
- No annual contract or subscription

Instructions on how to redeem it are below.

1. Go to <https://www.qoom.io/pricing>
2. Select "Starter" plan
3. Select "90-Days Access"
4. Enter the coupon code: **TERRI90QOOM**
5. Checkout!

The coupon code will be valid until **8/31/2021**.

Replit

Replit is an instant IDE to learn, build, collaborate, and host all in one place.

1 free month of Replit's hacker plan for all attendees

Redeem your free month of hacker plan here: <https://repl.it/claim?code=terris>

Taskade

Taskade is the all-in-one collaboration platform for remote teams. Map out your workflow, from ideas to action.

Upgraded to the Unlimited Account for 1 Year → More Info on How to Redeem Will be Released on **August 12th**.

.XYZ

XYZ is a technology company that provides domain names and related services to individuals and businesses worldwide.

Free .xyz domain for the first year

To redeem use this code: **TC2021**. The code expires on Sep 15, 2021.

Registration instructions can be found in the link below:

1Password

1Password is a password manager that provides a place for users to store various passwords, software licenses, and other sensitive information in a virtual vault that is locked with a PBKDF2-guarded master password.

1 Free Year of 1Password Families (new signups only) → More Info on How to Redeem Will be Released on **August 12th**.

1Password also has a message for Terris Challenge attendees: “We’re proud to offer 1Password Teams for free to the open-source community. This is part of our 1Password Teams for Open Source program. We use open-source software every day to build 1Password, and 1Password wouldn’t exist without it. This program is our way of giving back by helping more than 250 projects to stay secure. A safe place to keep secrets like social media logins, code signing certificates and SSH keys. We’d love to support your project! To apply, submit a pull request at:

<https://github.com/1password/1password-teams-open-source>”
